## **LOCK SEAL BASE**

### **USER INSTRUCTIONS:**

#### **How to ATTACH to whip:**

1. Unscrew bottom of the light base away from the light (this is the portion with the rubber o-ring)
2. Place the bottom part of the light base (along with the o-ring) over top of the whip light socket. Threads should be facing upward.
3. Affix the light to the 1156 lamp socket on the whip - lock tabs in place by pushing down slightly and turning clockwise.
4. Pull up the bottom part of the light base and screw onto top part - DO NOT TURN THE TOP PART OF LIGHT OR LIGHT WILL BE DAMAGED.

#### **How to REMOVE from whip:**

1. Unscrew bottom of the light base away from the light (this is the portion with the rubber o-ring) - DO NOT TURN THE TOP PART OF LIGHT OR LIGHT WILL BE DAMAGED.
2. Remove light from the whip socket by pushing down slightly and turning 1/4" counter-clockwise.
3. Remove the bottom part of the light base from the whip and screw back on the top of the light for storage.
